# INTERVIEW QUESTIONS

// Question No.36 "Implement a function that takes an array of objects with 'age' properties and returns an array of those who are adults (age 18 and above) using the `filter` method."

```
const filterAdults = (people) => {  
  return people.filter(person => person.age >= 18);  
};
```

```
const peopleArray = [  
  { name: 'John', age: 25 },  
  { name: 'Jane', age: 16 },  
  { name: 'Bob', age: 30 },  
];
```

```
const adultsArray = filterAdults(peopleArray);
```

```
console.log(adultsArray);
```

// Output:

```
[ { name: 'John', age: 25 }, { name: 'Bob', age: 30 } ]
```
