INTERVIEW QUESTIONS

// Question No.48 "Implement a function that takes an array of objects with 'age' properties and returns an array of those who are adults (age 18 and above) using the `filter` method."

```
let arrayOfStrings = ['apple', 'banana', 'kiwi', 'orange', 'grape'];  
let sortedArray = arrayOfStrings.sort((a, b) => {
```

```
  if (a.length !== b.length) {  
    return a.length - b.length;
```

```
  } else {  
    return arrayOfStrings.indexOf(a) - arrayOfStrings.indexOf(b);  
  }
```

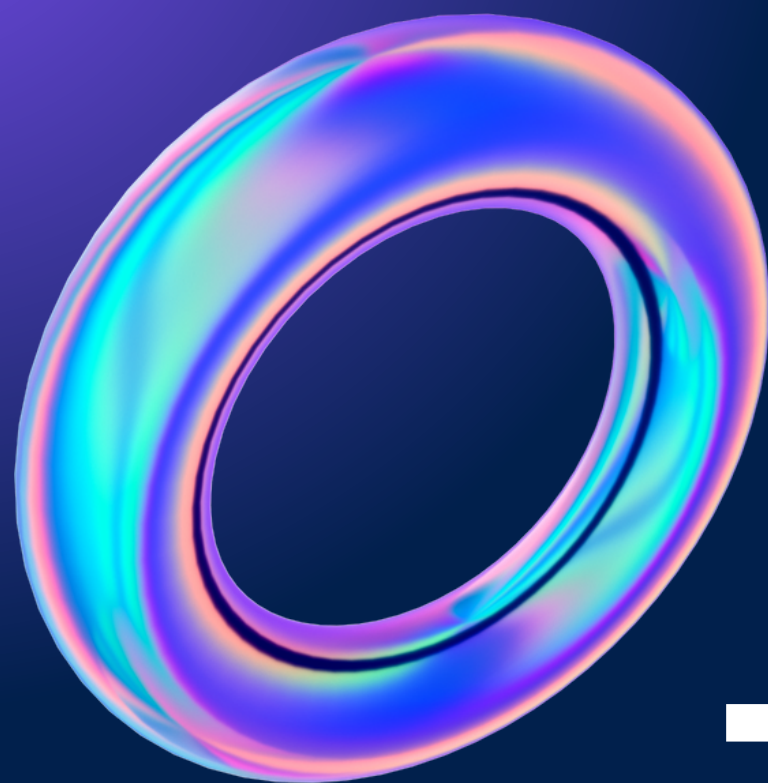

```
});  
console.log('Original Array of Strings:', arrayOfStrings);  
console.log('Sorted Array based on Lengths:', sortedArray);
```

// Output:

Original Array of Strings: ['kiwi', 'apple', 'grape', 'banana', 'orange']

Sorted Array based on Lengths: ['kiwi', 'apple', 'grape', 'banana', 'orange']
