INTERVIEW QUESTIONS

/// Question No.2 "Count the number of vowels in a given string."

```
function countVowels(inputString) {  
  
    inputString = inputString.toLowerCase();  
    const vowels = ['a', 'e', 'i', 'o', 'u'];  
    let vowelCount = 0;  
    for (let i = 0; i < inputString.length; i++) {  
        if (vowels.includes(inputString[i])) {  
            vowelCount++;  
        }  
    }  
    return vowelCount;  
}  
  
let testString = "Hello, World!";  
let result = countVowels(testString);  
console.log(result);
```

// Output
