INTERVIEW QUESTIONS

// Question No.44 "Use the `reduce` method to find the total sum of all even numbers in an array of integers."

```
let arrayOfIntegers = [1, 2, 3, 4, 5, 6, 7, 8, 9, 10];
let sumOfEvenNumbers = arrayOfIntegers.reduce((sum, num) => {
  if (num % 2 === 0) {
    return sum + num;
  } else {
    return sum;
  }
}, 0);
console.log('Array of Integers:', arrayOfIntegers);
console.log('Sum of Even Numbers:', sumOfEvenNumbers);
```

// Output:

```
Array of Integers: [
  1, 2, 3, 4, 5,
  6, 7, 8, 9, 10
]
Sum of Even Numbers: 30
```
