INTERVIEW QUESTIONS

// Question No.43 "Given an array of objects with a 'price' property, use the `sort` method to arrange them in descending order based on their prices."

```
let arrayOfObjects = [  
  { name: 'Product A', price: 25 },  
  { name: 'Product B', price: 10 },  
  { name: 'Product C', price: 35 },  
  { name: 'Product D', price: 15 }  
];  
  
arrayOfObjects.sort((a, b) => b.price - a.price);  
  
console.log('Sorted Array:', arrayOfObjects);
```

// Output:

```
Sorted Array: [  
  { name: 'Product C', price: 35 },  
  { name: 'Product A', price: 25 },  
  { name: 'Product D', price: 15 },  
  { name: 'Product B', price: 10 }  
]
```
