INTERVIEW QUESTIONS

// Question No.41 "Given an array of integers, use the `map` method to square each element and return a new array with the squared values."

```
let originalArray = [1, 2, 3, 4, 5];
```

```
let squaredArray = originalArray.map(num => num * num);
```

```
console.log('Original Array:', originalArray);
```

```
console.log('Squared Array:', squaredArray);
```

// Output:

Original Array: [1, 2, 3, 4, 5]

Squared Array: [1, 4, 9, 16, 25]
