INTERVIEW QUESTIONS

// Question No.26 "Explain the use of the break and continue statements within loops.
Provide scenarios where each might be used."

Using Break Statement:

```
const numbers = [1, 2, 3, 4, 5, 6, 7, 8, 9, 10];  
let target = 6;  
  
for (let i = 0; i < numbers.length; i++) {  
  if (numbers[i] === target) {  
    console.log(`Target ${target} found at index ${i}`);  
    break;  
  }  
}
```

// Output:

Target 6 found at index 5

// Question No.26 "Explain the use of the break and continue statements within loops.
Provide scenarios where each might be used."

Using Continue Statement:

```
const numbers = [1, 2, 3, 4, 5];
```

```
for (let i = 0; i < numbers.length; i++) {
```

```
  // Skip even numbers
```

```
  if (numbers[i] % 2 === 0) {
```

```
    continue;
```

```
  }
```

```
  console.log(numbers[i]);
```

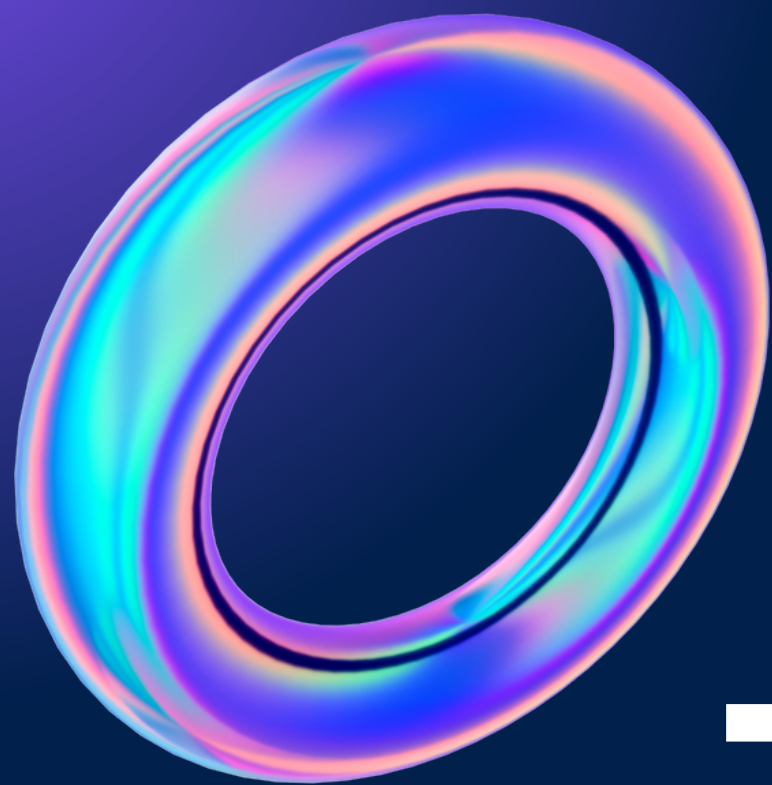

// Output:

1

3

5
