

# JAVASCRIPT

# INTERVIEW QUESTIONS

// Question No.19 "Explain the concept of "closures" in JavaScript and provide an example of their practical use"

```
function outerFunction(x) {  
  
    function innerFunction(y) {  
        return x + y;  
    }  
    return innerFunction;  
}
```

```
const closureInstance = outerFunction(10);
```

```
const result = closureInstance(5);  
console.log(result);
```

// Output

15
