# INTERVIEW QUESTIONS

// Question No.13 "Check if a number is even or odd and return a corresponding message."

```
function checkEvenOrOdd(number) {  
  if (typeof number !== 'number' || isNaN(number)) {  
    return "Invalid input. Please provide a valid number.";  
  }  
  if (number % 2 === 0) {  
    return `${number} is even.`;  
  } else {  
    return `${number} is odd.`;  
  }  
}
```

```
let testNumber = 7;  
let result = checkEvenOrOdd(testNumber);  
console.log(result);
```

// Output  
7 is odd.
