# INTERVIEW QUESTIONS

// Question No.42 "Take an array of strings, filter out the ones with a length less than 5, and then capitalize the remaining strings using the `map` method."

```
let originalArray = ["apple", "banana", "kiwi", "orange", "grape"];
```

```
let filteredArray = originalArray.filter(str => str.length >= 5);
```

```
let capitalizedArray = filteredArray.map(str => str.toUpperCase());
```

```
console.log('Original Array:', originalArray);
```

```
console.log('Filtered Array:', filteredArray);
```

```
console.log('Capitalized Array:', capitalizedArray);
```

// Output:

Original Array: [ 'apple', 'banana', 'kiwi', 'orange', 'grape' ]

Filtered Array: [ 'apple', 'banana', 'orange', 'grape' ]

Capitalized Array: [ 'APPLE', 'BANANA', 'ORANGE', 'GRAPE' ]
