JAVASCRIPT INTERVIEW QUESTIONS

// Question No.31 "Explain the purpose of the `filter` method. Provide an example where you use `filter` to extract elements from an array based on a specific condition."

Filter Method:

```
let numbers = [1, 2, 3, 4, 5, 6, 7, 8, 9, 10];

let evenNumbers = numbers.filter(function(number) {
  return number % 2 === 0;
});

console.log(evenNumbers);
```

// Output:
    [2, 4, 6, 8, 10]
