JAVASCRIPT INTERVIEW QUESTIONS

```javascript
// Question No.10 "Calculate the factorial of a number using a do-while loop."

function factorial(n) {

    if (n < 0 || !Number.isInteger(n)) {
        return "Invalid input. Please provide a non-negative integer.";
    }
let result = 1;
let i = 1;
    do {
        result *= i;
        i++;
}  while (i <= n);
 return result;
}                                                                           // Output
let number = 5;                                                             The factorial of 5 is: 120
let result = factorial(number);
console.log(`The factorial of ${number} is: ${result}`);
```
