JAVASCRIPT INTERVIEW QUESTIONS

```javascript
// Question No.47 "Implement a function that takes an array of objects with 'age' properties and returns an
//    array of those who are adults (age 18 and above) using the `filter` method."

function filterAdults(people) {
    let adults = people.filter(person => person.age >= 18);
    return adults;
}
let peopleArray = [
    { name: 'John', age: 25 },
    { name: 'Alice', age: 16 },
    { name: 'Bob', age: 30 },
    { name: 'Eva', age: 17 };                        // Output:
let adultsArray = filterAdults(peopleArray);         original Array of People: [
console.log('Original Array of People:', peopleArray);   { name: 'John', age: 25 },
console.log('Array of Adults:', adultsArray);        { name: 'Alice', age: 16 },
                                                     { name: 'Bob', age: 30 },
                                                     { name: 'Eva', age: 17 }
                                                     ]
                                                     Array of Adults: [ { name: 'John', age: 25 },
                                                     { name: 'Bob', age: 30 } ]
```
