JAVASCRIPT INTERVIEW QUESTIONS

Regular Functions:-

```
const obj1 = {
 name: 'Regular Function',
 sayHello: function() {                                    // Output:
  console.log(`Hello from ${this.name}`);                      Hello from Regular Function
 }
};
obj1.sayHello();
```

Arrow Function:

```
const obj2 = {
 name: 'Arrow Function',
 sayHello: () => {                                         // Output:
  console.log(`Hello from ${this.name}`);                      Hello from Arrow Function
 }
};
obj2.sayHello();
```
